Co. L, Land in heavy level open & third rate  
& the timber is W & B. Oak, marsh prairie  
& third rate High red top grass water lots etc,  
sup May 5<sup>th</sup> - 1834 - A. E. Wm. D. S.

The face of the country is level in  
general & the soil is poor & sandy in the  
wood land, & the timber is B. & W. Oak  
chiefly & of a small growth, & the N. E.  
is Oak whistle & sapo, bushes. The wet  
& dry prairie are separate & the growth  
thereon is coarse red top grass, the marsh  
prairie is much the largest & the soil  
is poor being a thin brown loam, red  
thin & rotten & the grass thereon is a  
fine red top & of a thin growth. They are  
also interspersed with groves of W. Oak,  
& whistle, The water is very frequently  
from 12 to 24 inches in depth on the wet  
marshy prairie & no current perceiv-  
- able in any direction.

These old Indian traces, are so dis-  
in many places as scarcely to be perceived  
& more especially in the marshy places  
where they frequently branch off, for  
the purpose of crossing places. -
